

Essanté Organics NourishMint™ Hair Conditioner

This balanced, highly effective hair conditioner moisturizes, nourishes and repairs the scalp/skin. It's a wonderful treatment with organic oils and botanicals - effective for alleviating seborrhea and other scalp conditions while restoring optimal moisture balance. High performance conditioning action assists with normalizing scalp function as individual hair shafts are strengthened. Smooths frayed hair cuticle for detangling ease. Helps repair split ends. Recommended for normal color, graying, and color treated or permed hair. It's also recommended when seborrhea or other unhealthy scalp conditions are present.

Experience the uplifting fresh scent of Peppermint combined with Tea Tree while superior nutrients such as Panthenol (Vitamin B-5), Vitamins A and E are delivered to your hair and scalp. Active ingredients penetrate to assist with re-establishing proper cellular balance, rejuvenate damaged hair, restore hair thickness and maintain optimal health. **Amino acids** help repair and re-moisturize damaged hair, infusing it anew with healthy movement, silkiness and shine. Fabulous **NourishMint™ Hair Conditioner** will meet the demand of today's sophisticated consumer, especially those searching for an effective scalp and hair treatment.

Does not contain toxic, plasticizing ingredients that coat strands of hair with "plastic" to create immediate de-tangling action.

For Best Results:

Apply to clean, wet hair. Massage into hair and scalp. Rinse immediately or leave in for a minute for additional scalp treatment and hair conditioning. For a massive protein and moisture infusion or to treat extreme seborrhea or psoriasis conditions, apply to clean, wet hair and wear under a cap for 15-30 minutes. Rinse thoroughly.

Ingredient Highlights

- ***Behentrimonium methosulfate***

The mildest hair-detangling ingredient available. It's made from non-genetically modified rapeseed oil. This ingredient is renowned for its superior detangling ability, without causing build-up on the hair. Unlike other hair detanglers, which are known for their irritancy, behentrimonium methosulfate is extremely mild, being recommended for use in baby products designed to be left on the skin. Provides superior effectiveness and mildness. It is not a sulfate.

- ***Peppermint (Mentha piperita) Essential Oil***

A cooling, refreshing oil that is analgesic, anti-spasmodic, anti-inflammatory, anti-fungal and anti-viral. It is beneficial for itchy skin, eczema, psoriasis, dermatitis, varicose veins, broken capillaries, hives, headache and inflammation. It stimulates the nerves and brain, enhancing concentration and study while simultaneously enhancing receptivity and creativity.

- ***Tea Tree (Melaleuca alternifolia) Essential Oil***

Tea Tree Oil has been referred to as a Medicine Chest in a bottle for decades. It has been used extensively as an anti-bacterial, anti-fungal, anti-infectious, wound healing and effective dandruff/seborrhea/psoriasis treatment. Derived from the steam distillation of the Tea Tree which grows naturally in Australia, Tea Tree Oil has repeatedly been documented to possess therapeutic properties that soothe and heal most skin/scalp irritations without damaging healthy tissue. It has been used extensively in medical and veterinary practices and is especially helpful in wound healing therapies.

- ***Vitamin A (Retinyl Palmitate)***

Vitamin A is known as an anti-aging vitamin effective in normalizing skin function while fighting free radicals.

- ***Vitamin B-5 (Panthenol)***

Vitamin B-5 effectively promotes healing inflamed, red, irritated skin/scalp, allowing skin/scalp to return to normal and preventing future problems.

- ***Vitamin E (Tocopheryl Acetate)***

Essential for normal red blood cells and tissue, Vitamin E soothes and protects skin from environmental pollutants as well as free radicals. Moisturizing from within, Vitamin E helps skin retain moisture, is a wonderful anti-oxidant and fights premature aging. Fine lines and wrinkles are less visible as Vitamin E leaves skin/scalp moist, soft and resilient.

- ***Rice Amino Acids***

These amino acids provide thickening properties to visually enhance the look of thin hair. They minimize hair loss from shampooing, restoring maximum luster and protecting hair from drying action of sun. Protects hair and scalp from damage caused by heat during styling. This protein has been tested and found to penetrate hair (especially where weak, split or broken). Up to 99% of substantive keratin amino acids were found inside hair. Hair tresses retain up to 35% more moisture.
